

Garage Gate Procedures

By working together as neighbors, we can be more secure.

General Rules for Entering and Exiting the Garage:

- Ensure the garage door closes completely before driving away from the building or driving into the garage to prevent unauthorized access.

Rules for Entering the Garage:

- Please be courteous- no tailgating.
- If someone is in the alley waiting to enter the garage behind you:
 - Drive into the garage. Stop. Allow the garage gate to start to close behind you.
 - If the person behind you is a Resident, they should then use their clicker. The gate will then reverse and open. This will "signal" that they are authorized to access the garage.
 - If the person behind you does not activate the gate to open, continue to wait until the gate closes completely.

Violations of these Rules are subject to a warning or fine.
